Cricket for Change  
The Cricket Centre  
Plough Lane  
Surrey, SM6 8JQ

Gentlemen:

**Re: USA Blind and Visually Impaired Cricket Initiative**

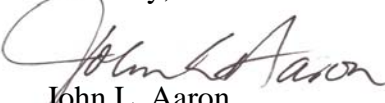

On behalf of the United States of America Cricket Association (USACA), I am extremely grateful for the visit of Cricket for Change to the New York City January 29-31, 2010, and your spirited efforts at helping us to initiate a blind and visually impaired cricket program here in the USA.

Your presence and encouragement in helping us to launch such an ambitious initiative is applauded by our President, CEO, and all at the national organization. We look forward to your return visit in May and hopefully by that time, we would have convinced many more stakeholders of the value of sharing the wonderful sport of cricket with those who are visually impaired.

I personally admire the work being done by Cricket for Change, not only in the United Kingdom, but throughout the world, in helping others to create positive changes in their lives. Closer to home, I am optimistic that USA Cricket can develop a symbiotic relationship with those established blind and visually impaired organizations in the Caribbean.

Once again, our sincere thanks for a wonderful visit, conference and live demonstration on the value of helping all sighted cricket stakeholders, see beyond the boundaries of the visually impaired.

Sincerely,

  
John L. Aaron  
Executive Secretary
